COMMUNICATION REALITY

GO WITHIN

The Reality of Being is within. To make contact and communication with your teachers and friends on the higher realms of life, you must go within and raise your consciousness to the highest level possible at the present moment.

LEARN TO DISCERN

One of the first things that your teachers may convey to you is to learn to discern the higher vibrations and the thought waves that they are projecting to you much of the time.

IT'S REAL!

At first it may seem difficult to give credit to the communication, just as most say the first time they are hypnotised, "I don't feel

any different. I don't think it's working." Or, the first few times some are regressed they immediately after awakening say, "I think I just made that up," and of course, they did make it up, or bring from their memory banks the experience from their so called past.

PERSONAL "LINGO"

Try not to make the same mistake when receiving communication from the other side of the veil. Your teacher knows you better than you know yourself at this point in consciousness and he may try to make the point of contact with you by drawing upon your individual personal "lingo." In other words, in order to get through to you, he may use your phraseology, or terminology to get the communication through. This is not always the case, but may be at first.

BRINGING IT THROUGH

When you are used to the contact and are giving it credit, he or she can then use their own style of impressing your mind. But, remember, they have to bring it down to the limitations of the language, plus the up-to-date terminology you are using at this point.

BE PATIENT!

The lack of real communication between those in the physical is the greatest problem on this planet today. So be patient with yourself and your teacher when you practice inter-dimensional communication.
